

Congratulations on the purchase of your Natures Sway product made from Nature's Palette certified organic fabric.

The dyes used to produce organic fabrics are derived from plants, vegetables, minerals and some animal products. All dyes are non-toxic, non-allergic, completely bio-degradable and environmentally friendly.

Each of the pieces of fabric are individually hand dyed with natural dyes. It is normal for hand dyed items to have some variation in colour hues. These variations are not defects but enhancements to the uniqueness of the fabric. We hope you enjoy them and join our efforts to promote a better, healthier world.

Care Instructions:

Hand wash with cold neutral detergent. Natural dyes are very sensitive to acid or alkaline detergents which may change colours. Ph neutral detergents should be used. Do not bleach. Tumble dry on low heat.
